**1. Detailed Action**

The applicant traverses the restriction requirement, asking the examiner to reconsider her position that a compound of formula I having an R2 that is an unsubstituted or substituted phenyl ring is patentably distinct from an R2 that is a condensed phenyl ring. However, in the instant case the different inventions have achieved a separate status in the art, have separate fields that aren't coextensive, and are capable of supporting separate patents. Further, a prior art reference that would anticipate the claims under 35 USC 102(b) would not render obvious the same claim(s) under 35 U. S. C. 103 (a) with respect to another member. Searching the entire genus would be a burden on the USPTO in terms of time and expense. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter, which the applicant regards as his invention.

Claim 10 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

A. In claim 10, line 1, page 24, the phrase "conditioned in two parts" is indefinite. What is meant by the phrase "conditioned in two parts"? It is not clear if the applicant means that the composition is comprised of two parts.

Claims 1-8, 11-17 are allowable as they read on the examined subject matter.

The IDS filed 7/17/03 has been considered.
